S412 Sense of viewing "target" location from slightly high elevation so as to look down on it.

### Observing

S412 Sense of firing something - allowing for travel time, distance, arcing, impact - Solid connection with intended goal. People involved experience solid feeling of satisfaction - "job well done" - about that part. Occurs at time of limited visibility - early morning / Early evening / inclement weather. Visibility conditions chosen because some light necessary for mission accomplishment but low vis. aids in successful attack / then escape. Some people involved wearing tan or light olive clothing. Considerable distance between "aunch" point + impact.

A/S / Air Bn attack maybe conducted from Aircraft.

A/S Bn  
Pearl  
Harbor

S412 Sense of satisfaction is greatest beyond "target" structure is regarded as highly protected, and hence essentially safe. This activity seen connected to other activity elsewhere, may, besides it, direct purpose, also serve to distract from other crucial operation elsewhere which is less overt but equally important + may have to do with attack physical penetration by a small group of a guarded, secured area, + escape at same designated individual.
